

Automated notifications via SMS, Telegram, or E-mail about events involving railcars

Providing various access levels for different user groups

Regular data updates, up to 96 times per day

Calculating distances between railroad stations and mapping the routes

Providing information about wagon and container location based on a list of wagons and agreed criteria

Management of wagon fleet and processing of transportation requests

- Cargo speed control
- Managing leases and subleases
- Automated distribution of data and alerts to users
- Configuring approaches for consignees
- Monitoring downtime at stations
- Providing technical documentation for wagon
- History of wagon and container traffic (full data archive)
- Reports and data exports (traffic, repairs, downtime, etc.)

Free connection, maintenance, and technical support

- Charges apply only to tracked wagons and containers
- For permanently tracked wagons, the location costs include technical data (mileage, equipment, repairs, and technical passport)
- Free customization of any required features
- No installation of any additional devices (like GPS) is required

| Wagon number | Destination station | Departure date and time | Location of last operation | Date and time of last operation | Operation   | Distance till the station of | Freight  | Days without movement | Main group | Cargo weight | Date of next report |
