

About us

We accelerate digital transformation across healthcare software, automation, cloud, and data platforms.

Security, compliance & reliability is in our core.

Rapid innovation & delivery with no friction.

Seamless integration with internal teams and cross-functional stakeholders.

Our Services

End-to-end integrations

- Connect disparate IT applications into a single, reliable flow of information
- Replace manual hand-offs and duplicate data entry with automated, system-to-system integrations
- Give teams one clear, trusted view of operational data across systems

Operational Visibility & Reliability

- Provide clear, shared visibility into the health of critical IT systems and applications
- Ensure early detection of issues before they impact clinicians, labs or patients
- Practical, business-focused problem solving that addresses root causes, not just symptoms

Rapid development

- Fast, focused discovery to clearly define what needs to be built
- Working prototypes delivered in days, enabling early field testing without disrupting live systems
- Incremental rollout that fits safely around existing systems and processes
- A clear controlled path from pilot to scalable production solution

Proven impact

- Process setup and delivery times reduced by up to **75%**
- **Manual data** handling significantly **reduced or eliminated**, freeing teams for higher-value work
- Production-ready solutions delivered predictably, from discovery to MVP in **weeks, not years**

Proven impact

- Up to **95% reduction in repeat incidents**
- **Lower operational costs** through fewer disruptions and more effective use of engineering time
- Issues identified and resolved before they become visible to end users or customers

Proven impact

- First usable product available **within days**, enabling rapid validation
- Live pilot deployed **within weeks**, not months
- Minimal disruption to existing operations during testing
- Secure by design architecture - no high or critical level issues found in penetration tests.

Why partner with Double Helix?

Lean-minded, senior-level engineers with hands-on delivery experience

Proven delivery in regulated, high-compliance healthcare environments

Security, compliance, and operational reliability built into every engagement

Rapid innovation and delivery, from prototype to production with minimal friction

Seamless integration with internal teams or independent delivery squads
